Module 3: SRS & PRD Document

Teacher Dashboard & Admin Direct Communication Engine

Module Name: Teacher Portal & Work Reassignment
Document Type: Combined SRS & PRD
Target Platform: Web / Mobile Web (React.js)
Version: v2.1 Final

1. EXECUTIVE SUMMARY & SCOPE

The Teacher Dashboard equips faculty members with transport check-in controls, assigned bus location tracking, and a **restricted direct chat pipeline to the Admin Dashboard** for reporting delays/emergencies and receiving dynamic work coverage assignments.

2. TEACHER DASHBOARD FEATURES

- **Transport Roster & Check-In:** Teachers check in prior to the 10-minute cutoff for their assigned bus stop, updating the driver's roster.
- **Live Tracking:** Accesses the 100-meter published location stream for their designated bus.
- **Emergency Status Reporting:** Dedicated quick-action toggle to report status (`ON_TIME` , `LATE` , `ABSENT`).

3. EXCLUSIVE TEACHER-ADMIN REAL-TIME CHAT ENGINE

A private WebSocket messaging channel (`/chat/teacher-admin`) connects teachers exclusively with the Admin Control Tower.

```
[ Teacher Portal ] [ Admin Control Tower ] | | |--- 1. Send Alert: "Delayed 30m due to traffic" ------
```

4. WORK REASSIGNMENT DATA MODEL

Field Name	Data Type	Description
`thread_id`	VARCHAR(50)	Unique chat thread identifier (`CHAT-TCH{id}-ADMIN`).
`delay_reason`	Text	Emergency message payload submitted by teacher.
`reassigned_teacher_id`	UUID	Foreign key of free teacher assigned by Admin for coverage.
`reassignment_status`	Enum	Shifts from `PENDING` to `REASSIGNED` upon Admin action.
